ABOUT ME

I am an *Ambitious* person , always looking for *New Knowledge*  and, since the first scholastic years, very good at *Working within a Team* . I am interested in *Software Developer*  or *Administrator*  role. I took a *Salesforce Academy*  at Experis - Manpower Group (see my trailblazer.me profile: [lorenzoturco](https://trailblazer.me/lorenzoturco)).

EXPERIENCE

Teaching Tutor

Università degli Studi di Genova

 Sep 25, 2019 – Apr 4, 2020  Genoa, Italy

Teaching Tutor experience of

- General Physics
- Mathematical Analysis
- Analytical Geometry and Linear Algebra

for first year students of the Bachelor's Degree Course in Mechanical Engineering.

EDUCATION

Master's Degree in Theoretical Physics

Università degli Studi di Genova

 Sep 2018 – Oct 29, 2020  Genoa & Turin, Italy

Thesis title: Neutron-star mergers in scalar-tensor theories of gravity (EN)

Thesis supervisors: Prof. Gianluca Gemme – INFN & Dr. Alessandro Nagar – IHES. **Co-supervisor:** Prof. Nicola Maggiore – INFN

Final Grade: 110/110 cum Laude

Bachelor's Degree in Physics

Università degli Studi di Genova

 Sep 2015 – Sep 28, 2018  Genoa, Italy

Thesis title: Extension of the Coulomb and Biot-Savart laws to the non-static case: Jefimenko's equations (IT)

Thesis supervisor: Prof. Lorenzo Mattera – UniGe

Final Grade: 110/110 cum Laude

COMPUTER ACHIEVEMENTS

Final grade: 100/100

SCIENTIFIC SKILLS

During my study path, and my thesis work, I had the opportunity to elaborate on several topics of physics and mathematics.

- **Gravity.** Since the last Bachelor year, I focused my attention on the theory of *General Relativity* including several solutions, cosmology, causal structure of spacetime, singularity theorems and calculation techniques in *Gravitational Waves* theory. In my Master's Degree thesis I also had the opportunity to study *Scalar-Tensor* theories of gravity and the Gravitational Waves theory in this framework with my supervisor Dr. Alessandro Nagar and his research group (📍 Turin, Italy).
- **Particle Physics.** My interests also turn to *Quantum Field Theory* and the *Standard Model* of Particle Physics, including the construction of the model starting from *Group Representation Theory* and some phenomenological calculations.

ORGANIZATIONS

National Institute for Nuclear Physics (INFN), section of Genoa

📅 Nov 2019 – ongoing

Position: Associate

Group: National Scientific Commission (CSN) II

VIRGO Collaboration

📅 Dec 2019 – Nov 2020

Position: Member

Affiliation due to the work on the Gravitational Waves within my Master's Degree thesis
